

# Exercise 2A GitHub

By Kateryna Kononikhina 77610

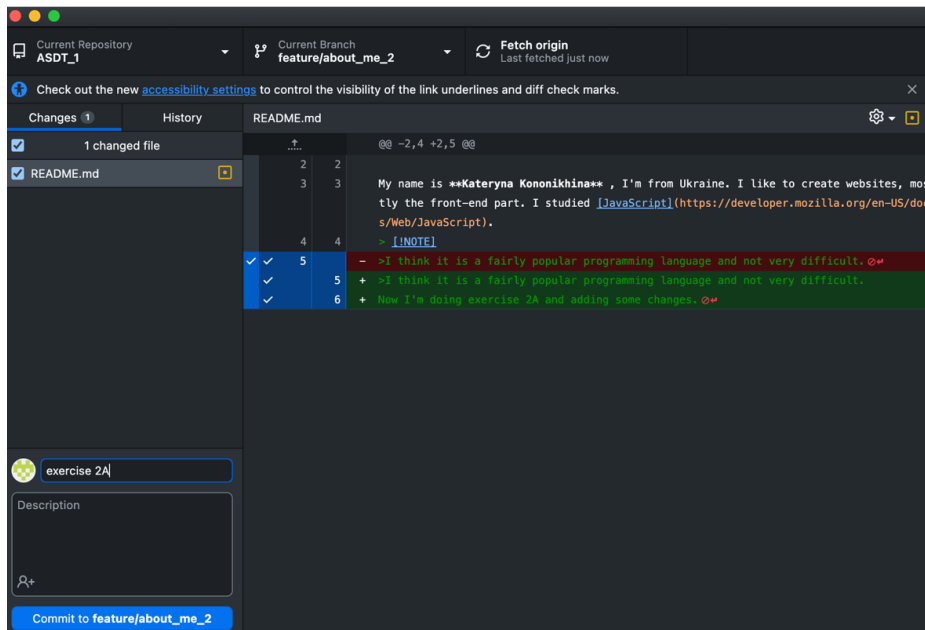

1. I cloned repository and added a new branch

2. Then I changed file README.md , istalled Git command and checked a version, added my user name and email , then checked a configuration . Also checked that Git Credential Manager was installed ( credential.helper=manager)

### 3. Committed and pushed changes to repository

### 4. Created a pull request for main branch and merged it .
